Boletín de suscripción

A remitir a SOFT-SPECTRUM C/. Bailén, 20. 1.º Izda: 28005 Madrid

Deseo suscribirme a los 11 n.ºs de la revista

por sólo 1950 pts.

- El importe lo haré efectivo:
- Por giro postal n.º
- ☐ Por talón nominativo adjunto.
 - Contra reembolso a la recepción del primer ejemplar, más gastos de envío.

Deseo suscribirme a partir del n.º (inclusive).

Nombre y apellidos:

Ciudad: Teléfono Fecha Firma

En este número vamos a empezar una serie de ideas de como utilizar la función POKE, como todos sabemos la función POKE se utiliza para introducir un valor directamente en la memoria RAM de nuestro ordenador.

En el **Spectrum** existe una zona de memoria que el ordenador necesita para su uso interno, esta zona es la denominada variables del sistema, esta zona está comprendida entre la posición de memoria 23552 hasta la 23732. Si tenemos un conocimiento profundo de lo que hace cada una de esas posiciones, tendremos un poder muy grande sobre el ordenador, pero si por el contrario no las conocemos podremos destruir muy fácilmente cualquier programa que tengamos en ese momento en memoria.

En números posteriores iremos describiendo lo que hacen todas y cada una de estas posiciones.

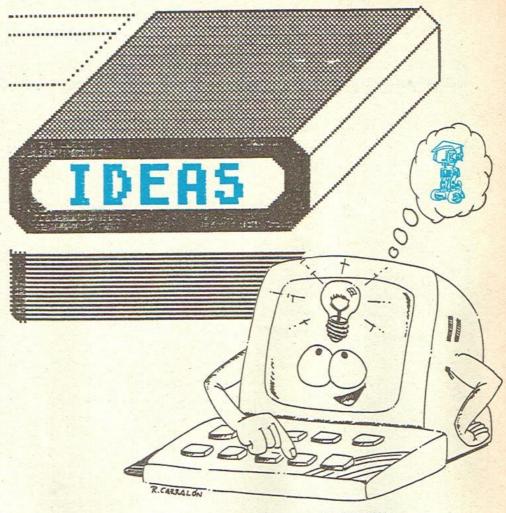

En este número le ha tocado el turno a la variable CHARS esta variable se encuentra en las posiciones 23606 y 23607, en estas dos posiciones de memoria está la dirección donde se encuentra el juego de caracteres en la ROM, esta dirección está guardada en dos Bytes si queremos saber cual es esta dirección tendremos que teclear lo siguiente:

PRINT (PEEK 23606 + 256 * PEEK 23607) - 256

La dirección que nos dé como resultado de esta operación será la dirección donde empieza el juego de caracteres en la ROM. El juego de caracteres tiene una longitud de 768 Bytes.

Variando los datos contenidos en esta dirección podremos obtener efectos

muy interesantes.

Los Micro Drives del ZX SPECTRUM Utilización y aplicaciones

Subrutinas y trucos

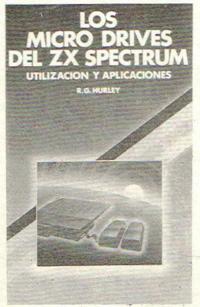

Al incrementar la capacidad de su Spectrum con la adición de un Microdrive, necesita una guía completa que le permita utilizar al máximo esta expansión. Para ello se describen con el máximo detalle las técnicas de manejo de archivos y proceso de datos, de forma que pueda escribir, leer y cambiar datos de manera

Ahora puede programar en su Spectrum una AGENDA ELECTRONICA con listado diario. Se incluye un listado completo de este programa, con el que puede introducir, variar y borrar todos los compromisos del año, permitiéndole obtener una copia de los sucesos previstos para el día, cada mañana.

Ahora tiene la posibilidad de hacer una red de Spec-

trums con los de sus amigos, multiplicando su capacidad en complejos juegos multiusuario. Se incluye una completa explicación con ejemplos para explotar este aspecto.

Richard Hurley estudió Astrofísica en la Universidad de Londres antes de ejercer como profesor de matemáticas en Hurstpierpoint College. En la actualidad es el responsable del Departamento de Estudios de Ordenadores del citado centro.

Lenguaje Máquina del ZX SPECTRUM

Esta obra presenta de manera progresiva el ensamblador del microprocesador Z 80 v su aplicación sobre el ZX SPECTRUM.

Está destinada a aquellas personas que desean saber más sobre el funcionamiento interno de su microordenador para sacarle el mejor partido, según sus posibilidades, y aumentar la velocidad de ejecución de los programas. El ensamblador es, en efecto, el lenguaje más rápido que el BASIC y es el único que permite la ejecución de juegos de acción rápida de alto nivel.

Además de las instrucciones abundantemente detalladas del Z 80, este libro suministra una serie de subprogramas que serán excelentes ejemplos para los principiantes, a los cuales permitirá fácilmen-

Es un útil indispensable para todo aquel que desee programar en ensamblador sobre el ZX SPECTRUM.

TU MICRO EN SU MESA

Esta mesa ocupa un espacio mínimo permitiéndote tener en un mismo espacio todo tu equipo, su sistema de plataforma desplazable impone la distancia visual recomendada del monitor/T.V.

DIMENSIONES: Cerrada: 0,74 × 0,50 × 0,73 m.

Abierta: $0.74 \times 0.84 \times 0.73$ m.

CARACTERISTICAS:

- Se fabrica en los siguientes acabados: Tablero bilaminado nogal, roble y blanco.
- Se entrega desarmado, en un embalaje de cartón.
- El montaje es sencillo, mediante un sistema de atornillados de alta penetrabilidad con llave exagonal
 que se adjunta.
- Todo el cableado desaparece de la vista, evitándose el enredo tradicional ocasionante de caídas y
 accidentes.
- El depósito de cassettes es totalmente visible y accesible.
- En la mesa auxiliar, Mod. 002, además de la impresora se pueden colocar cassettes, listados, libros, etcétera.

CONDICIONES DE VENTA:

 El pedido será servido de forma inmediata contrareembolso siendo por cuenta del comprador los gastos de transporte.
